

# **Sagarino, Al Drazen C.**

+639303382904. aldrazensagarino@gmail.com. NHA Bangkal Davao City, Philippines

## **Education**

University of Mindanao, Main Campus - Bachelor of Science in Information Technology, 2025

## **Experience**

### **Junior Frontend Developer, Aquila Softwares, Davao City - June 2025 - Present**

Worked on client-delivered systems (HRIS, Inventory, Care Solutions) and Aquila Softwares' own products (Bettermomsh, Clinic Systems).

- Developed the frontend architecture and integrated APIs for a comprehensive HRIS Recruitment Module, enabling end-to-end user experiences for job management and applicant tracking across web (React) and mobile (React Native) platforms.
- Sole frontend developer for a production Inventory Management System using React, TypeScript, SCSS, Ant Design, and MobX, implementing UI, API integration, and real-time notifications for job order deployment and returns via WebSockets.
- Contributed as the sole frontend developer for the ongoing Bettermomsh e-commerce platform (<https://bettermomsh.com/>), handling UI architecture, reusable components, responsive layouts, product pages, cart/checkout flow, and API integration using React, TypeScript, Tailwind CSS, Lucide React, and Ant Design.
- Maintained the company's three core Clinic Systems, implementing new feature development, UI/UX improvements, API integrations, system refactoring, and resolution of critical production issues.
- Implemented UI components, routing, form systems, API calls, and performance optimization for Care Solutions (Next.js Platform) using Next.js, React Server Components, and TypeScript.
- Collaborated closely with backend teams to align data structure, resolve API issues, and improve system performance across multiple applications.
- Improved developer experience by refactoring UI components, implementing scalable state management (MobX), and introducing reusable and consistent UI patterns.

### **Intern - Frontend Developer, Aquila Softwares, Davao City - March - June 2025**

Front-end developer using React Typescript

- Built the frontend of the Inventory Management System from scratch, implementing UI design, routing, and API integration for backend connectivity.
- Designed and implemented a new feature in the Clinic System, handling UI and API integration end-to-end.
- Supported UI development and bug fixes across three Clinic Systems, improving stability and user experience.

## Recent Projects

### Web Portfolio

<https://al-drazen-sagarino.vercel.app/>

- Deployed a responsive personal portfolio showcasing experiences, technical expertise, and recent projects using React, TypeScript, Tailwind CSS, and RadixUI.

### MassagEase (Capstone Project)

<https://play.google.com/store/apps/details?id=com.massageaseapp.massagease&hl=en>

A cross-platform mobile booking application for wellness massage using the Gale-Shapley algorithm and Supabase.

- Designed and developed the UI and front-end of the application using Flutter (Dart).
- Set up user authentication and database integration with Supabase and Google Auth.
- Implemented core functionality, including the in-app messaging and booking system, leveraging the Gale-Shapley algorithm.
- Integrated third-party services such as Google Maps API for location-based features and Google SMTP Server for email notifications.
- Tools used: Dart, Flutter, Supabase, Google SMTP Server, Google Auth, Google Maps API

## Certifications

- Information Technology Specialist (Certiport) - Network Security (2024)
- Information Technology Specialist (Certiport) - Cybersecurity (2024)
- Information Technology Specialist (Certiport) - Networking (2023)
- Information Technology Specialist (Certiport) - HTML and CSS (2023)

## Skills

- HTML
- CSS
- JavaScript
- TypeScript
- ReactJS
- NextJS
- Flutter
- React Native
- Progressive web apps
- NodeJS
- PHP
- C#
- SQL
- PostgreSQL
- Supabase
- Firebase
